

**Biomedical Informatics:
Computer Applications in Health Care and Biomedicine**
(Fifth Edition)
Springer, London

Edward Shortliffe and James Cimino, Editors
Noémie Elhadad and Michael Chiang, Associate Editors

Contents

I. Recurrent Themes in Biomedical Informatics

1. **Biomedical Informatics: The Science and the Pragmatics**
Edward H. Shortliffe and Michael F. Chiang
2. **Biomedical Data: Their Acquisition, Storage, and Use**
Edward H. Shortliffe and Michael F. Chiang
3. **Biomedical Decision Making: Probabilistic Reasoning**
Douglas K. Owens, Jeremy Goldhaber-Fiebert, and Harold C. Sox
4. **Cognitive Informatics**
Vimla L. Patel and David R. Kaufman
5. **Human-Computer Interaction, Usability, and Workflow**
Vimla L. Patel, David R. Kaufman, and Thomas Kannampallil
6. **Computer Architectures for Health Care and Biomedicine**
Jonathan C. Silverstein and Ian T. Foster
7. **Software Engineering for Health Care and Biomedicine**
Adam Wilcox, David Vawdrey, and Kensako Kawamoto
8. **Standards in Biomedical Informatics**
Charles Jaffe
9. **Natural Language and Text Processing in Health Care and Biomedicine**
Noémie Elhadad, Carol Friedman, and Dina Demner Fushman
10. **Machine Learning in Health Care**
Noémie Elhadad and Rajesh Ranganath
11. **Bioinformatics**
Sean Mooney, Jessica Tenenbaum, and Russ B. Altman
12. **Imaging and Structural Informatics**
Daniel L. Rubin, Hayit Greenspan, and Assaf Hoogi
13. **Personal Health Informatics**
Holly Jimison, Robert M. Cronin, and Kevin Johnson
14. **Ethics and Health Informatics: Users, Standards, and Outcomes**
Kenneth W. Goodman and Randolph A. Miller

15. Evaluation of Biomedical and Health Information Resources*Charles P. Friedman and Jeremy Wyatt***II. Biomedical Informatics Applications****16. Electronic Health Record Systems***Genevieve Melton, Clement J. McDonald, Paul C. Tang, and George Hripcsak***17. The Health Information Infrastructure***William A. Yasnoff***18. Management of Information in Health Care Organizations***Lynn Vogel and William C. Reed***19. Patient-Care Systems***Suzanne Bakken, Patricia Dykes, Sarah Collins, and Judy Ozbolt***20. Public Health Informatics***Martin LaVenture, David A. Ross, William A. Yasnoff, and Catherine J. Staes***21. mHealth and Applications***Wanda Pratt, Eun Kyung Choe, and Pedja Klasnja***22. Telemedicine and Telehealth***Michael F. Chiang, Justin Starren, and George Demiris***23. Patient Monitoring Systems***Vitaly Herasevich, Reed M. Gardner, Terry P. Clemmer, and Roger G. Mark***24. Imaging Systems in Radiology***Bradley Erickson***25. Information Retrieval and Digital Libraries***William Hersh***26. Clinical Decision-Support Systems***Mark A. Musen, Robert A. Greenes, and Blackford Middleton***27. Computers and Simulation in Health Science Education***Parvati Dev and Titus Schleyer***28. Translational Bioinformatics***Jessica Tenenbaum, Nigam Shah, and Russ B. Altman***29. Clinical Research Informatics***Philip Payne, Peter Embi, and James J. Cimino***30. Precision Medicine and Informatics***Joshua C. Denny and Matthew Might***III. Biomedical Informatics in the Years Ahead****31. Health Information Technology Policy***Robert S. Rudin, Paul C. Tang, and David W. Bates*

32. The Future of Informatics in Biomedicine

James J. Cimino, Edward H. Shortliffe, Michael F. Chiang, and Noémie Elhadad
